FABIO VALENTE

TECHNICAL PROJECT MANAGER | AI WORKFLOW & AUTOMATION SPECIALIST

Bogotá, Colombia | valente.f.f@gmail.com | linkedin.com/in/fabiofvalente

PROFESSIONAL PROFILE

Mechanical engineer and technical project lead combining operations management with AI-assisted workflows, trading technology and process improvement. Translate business needs into requirements, implementation plans, controls and testable deliverables; coordinate AI-assisted development, review system behavior and manage release decisions. Former leader of a 48-person maintenance operation. Fluent in English, Spanish and Portuguese; based in Colombia and seeking remote technical operations, project delivery and AI workflow roles.

CORE CAPABILITIES

Technical project delivery | Requirements and acceptance criteria | AI workflow operations | Process improvement | Cross-functional coordination | QA and validation | Technical documentation | API/webhook integration oversight | Operational risk controls | Trading systems research

PROFESSIONAL EXPERIENCE

Independent Technical Project Lead | AI Workflows & Trading Technology

Independent technology projects | Bogotá / Remote | Oct 2021 - Present

- Lead requirements, task planning, technical documentation, implementation reviews, testing and release decisions for independent software, automation and analytical projects.
- In 2026, configured and operated AI-assisted workflows involving 21 defined agent roles across three internal operations; designed exception handling, review ownership and human approval gates.
- Coordinated a scheduled opportunity-research workflow that delivered 12 consecutive weekly reports, maintained 127 structured history records and verified sources before including results.
- Managed quality checks for a B2B automation website and related workflows, documenting 20 passing automated tests and release approval criteria.
- Create TradingView indicators in Pine Script and coordinate AI-assisted trading research tools, including backtesting, walk-forward analysis and robustness testing.

Technical Market Analyst | Ongoing Contract

Confidential client | Remote | Current

- Produce recurring technical analysis for a paid subscriber audience, translating market structures, scenarios and risk considerations into clear, usable commentary.

Risk Engineer | Loss Prevention & Process Improvement

SBS Seguros Colombia | Bogotá, Colombia | Mar 2018 - Sep 2021

- Designed and implemented a SharePoint tracking workflow for risk-engineering activities, client recommendations, follow-ups and corrective actions.
- Coordinated technical work across clients, contractors and specialist providers; improved tracking and reporting of engineering resources.

EARLIER ENGINEERING LEADERSHIP

Agricultural Maintenance Supervisor | Technical Support

Grupo São Martinho (Usina Santa Cruz) | São Paulo, Brazil | Jun 2015 - Oct 2017

- Led a 48-person maintenance operation serving approximately 400 agricultural vehicles and machines, with responsibility for maintenance planning, operational priorities and team coordination.
- Organized preventive, predictive and corrective work; monitored KPIs, coordinated suppliers and supported equipment availability.

Automotive R&D Engineering Intern

Amtek Tekfor | Germany | Mar 2013 - Aug 2013

- Designed specialized machinery for repeatable automotive material testing, with emphasis on test reliability and rapid specimen changes.

SELECTED DELIVERY EXAMPLES

AI research and reporting workflow | 2026 Documented scheduled data collection, filtering, CSV-based history, verification of external sources and Discord report delivery, with explicit handling of inaccessible information.

Governed multi-agent operations | 2026 Defined Hermes/Paperclip agent responsibilities, handoffs, audit records and human authorization for external publication, spending and financial actions.

Trading-system research validation | 2026 Specified research protocols for backtesting, walk-forward evaluation, robustness checks and independent review, emphasizing reproducibility and rejection of unsupported performance claims.

Market analysis and technical communication | Ongoing Publish TradingView-based market research and explain technical strategies to Portuguese-speaking audiences through independent content and contract analysis.

EDUCATION

MBA in Project Management (University Extension Specialization, 400 hours) | University of São Paulo (USP/ESALQ), Brazil | 2019

B.Eng., Mechanical Engineering | Federal University of São Carlos (UFSCar), Brazil | 2014

Academic Exchange, Mechanical Engineering (non-degree) | Hochschule Offenburg, Germany | 2012-2013

TOOLS & LANGUAGES

Tools and workflows | Pine Script / TradingView (hands-on); Hermes, Paperclip, Git, SharePoint, SAP, Vercel, Discord, JSON/CSV, REST APIs and webhooks.

AI-assisted development | Coordinate specifications, code review and functional testing for Python, TypeScript and C# implementations.

Languages | Portuguese (native); English (fluent); Spanish (fluent).
